Gibco media and feeds selection guide

Navigate to the catalog media and supplements that work best with your specific cell line

Identify your cell line:

If our standard catalog products aren't right for you, then try our cell line development programs and custom media development and optimization services.

* Dynamis Medium and CD OptiCHO Medium both perform well with the DG44 cell line. When deciding which medium to use, consider adaptation. CD OptiCHO Medium usually requires little or no adaptation. The fortified formulation of Dynamis Medium may require sequential adaptation.

** CD CHO Medium has been used by Lonza in developing cells for the GS system and can work well in many cases. If recommended by Lonza to do so, we would recommend starting there. If there is time to consider potential adaptation to a more fortified medium, Dynamis Medium can also provide an option that may lead to even higher titers.
